

SAVA 1014 Smart AV remote extender

Article number (SKU)
Colour

8310143
Anthracite metal

Key Benefits

- Quick and easy installation
- Using an infrared extender, you can easily operate your devices inside a closed (TV) cabinet
- Operate peripheral equipment in a closed TV cabinet
- Insensitive to use in indirect sunlight

The remote extender transmits the signal from the remote control. AV equipment remains out of sight. The remote extender transmits the signal from the remote control

Via a small receiver in the SAVA 1014, the signal from the remote control is transmitted to your AV equipment or TV decoder using innovative infrared technology. Infrared range up to 10 metres. Suitable for virtually any AV equipment brand.

Nice and tidy

Control your AV devices even when they are out of sight. The remote control signal is transmitted to your equipment via a small receiver, meaning that your cabinet doors can stay closed. Modern infrared technology guarantees a reliable connection and is suitable for the latest equipment. Reliable infrared technology. No more open cabinet doors - the SAVA 1014 allows you to control your AV equipment via a small IR extender. It transmits the signal from your remote control to your AV equipment using the latest infrared technology (IR blaster LED). This means that you can zap with the cabinet doors closed! Attaching LEDs to your valuable equipment is no longer necessary. The Quality Signature. When you purchase one of Vogel's SAVA products, you are always guaranteed quality and innovation. Smart and sustainable products that do what they are supposed to do. As part of Vogel's 'Quality Signature', you can always count on: reliability, design, innovation, ease of use and ease of installation.
