Key Benefits

- Convert digital audio to a stereo signal
- With improved 192kHz sample rate
- With Wolfson DAC (digital-analog converter) for the best audio quality

Converts a digital audio signal to an RCA connection. Connects new and old connections

The SAVA 1041 makes it possible to connect AV devices with a Toslink or Coaxial output to an RCA input. With improved 192kHz sample rate for the best audio quality. Supports uncompressed digital stereo signals.

Expand the digital outputs on your AV equipment

Does your amplifier have too few digital outputs or even none at all? The SAVA 1041 converts a digital (Toslink or coaxial) audio signal to an RCA signal. This makes it possible to play the digital audio from your TV, for example, through your existing audio system. Connect AV devices that have a Toslink or coaxial output to an RCA input. Ideal for when there are too few or no digital audio inputs available. The Quality Signature When you purchase one of Vogel's SAVA products, you are always guaranteed quality and innovation. Smart and sustainable products that do what they are supposed to do. As part of Vogel's 'Quality Signature', you can always count on: reliability, design, innovation, ease of use and ease of installation.
